What's In The Package?

- Flight Case – a carry case for your professional diving light
- Seawolf A-2660 light unit – our 22,000 lumen dive light
- 60 degree lens
- 90 degree lens
- Battery unit + 3 Li Batteries
- Connecting cable
- User manual

The lamp Head of the Next Generation 2260 can be swapped and interchanged allowing users to purchase other lamp heads in different wavelengths through the entire spectrum from UV right through to Infra Red. Replacement lamp heads are changed via two screws taking approximately 1-2 minutes – this means you can get right back underwater and back to filming.

The 2260 lamp head can also be used with the SSL cable turning it into a top side light running from 12-48Vdc

The 2260 Lamp head can be used with the SSU Cable changing it from battery powered with canister to umbilical powered without canister running from 36-48Vdc.
